ELIZABETH KOLBERT

It is said that we live in a new geological epoch characterized by climate change and other disastrous human impacts on the planet. In her new book, *Under a White Sky: The Nature of the Future*, Pulitzer Prize-winning author Elizabeth Kolbert takes a hard look at the new world we are creating. Should we be seeking technological solutions to the damage humans have caused to the environment, or will such “solutions” only make the problems worse?

Copies of Kolbert’s books will be available for purchase and signing, courtesy of Chaucer’s Books. Visit the event page for more information: bit.ly/Kolbert-IHC

Elizabeth Kolbert is a Pulitzer Prize-winning author and a staff writer for *The New Yorker*. Her latest book is *Under a White Sky: The Nature of the Future*. Her previous book, *The Sixth Extinction: An Unnatural History*, was a finalist for the National Book Critics Circle awards for the best books of 2014, won the 2015 Pulitzer Prize in the General Nonfiction category, and is number one on the *Guardian’s* list of the 100 Best Nonfiction Books of all time.

Sponsored by the IHC’s Regeneration series and the IHC Idee Levitan Endowment
